

# About Seminar

The present time is going through transitional shifts and its in a face of "Digital Transformation". This Revolution era is largely driven by technical & educational areas. It is reshaping government, education, healthcare, commerce and almost every aspect of life globally. The purpose of this International Conference is Computational Intelligence with security, which explores and discovers the practical aspects of Computational Intelligence and its impact on various facets of society. Computational Science is interdisciplinary field by nature and includes the use of advanced computing capabilities to understand and solve complex problems. The conference will enable researchers, academicians, engineers and practitioners to discuss and explore areas related to Theory, Development, Applications, Experiences and Evaluation on a common platform.
